Calibration repair and sales

▶ ▶ ▶ *Australia's leading calibration laboratory. Established 1989.*

Introduction

► VMS International, Australia's leading group of calibration laboratories, providing solutions since 1989. Comprehensive NATA accreditation and ISO certification ensures traceability to standards and quality of measurement essential in today's competitive environment.

VMS has you covered with laboratories located in Brisbane and Sydney.

Our philosophy in business is simple. That is we aim to provide "the best service, at the best price, in the best time". Try us and discover how we can make a difference to your business!

Sales

► Utilising years of experience, VMS has developed a knowledgeable sales team that can provide the right product for your business needs. Through our expertise and Authorised Service Agreements, VMS have been awarded regional distributors for a range of companies including Honeywell in the aviation industry.

Standards laboratory

► Sydney's premier "standards laboratory". Located in Milperra, just off the M5 Motorway, offers state of the art electronic, temperature and pressure calibration.

It is one of the most capable and accredited NATA laboratories in Australia.

Calibration laboratory

► The Brisbane static "calibration laboratory" located at Coopers Plains offers a variety of calibration and repair solutions. It is Queensland's leading calibration laboratory with NATA and ISO accreditation.

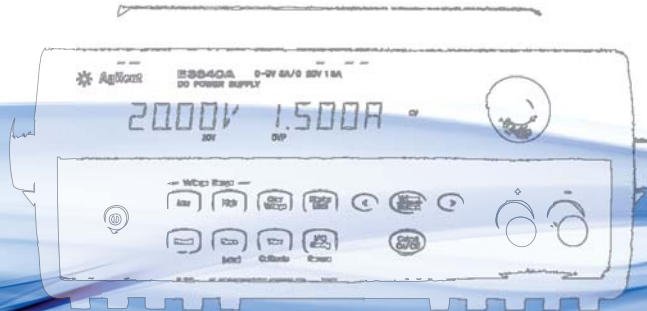

► ► ► *ask for a tour on your next visit*

Mobile Calibration Laboratory (MCL)

► Affectionately known as the MCL, is NATA and ISO accredited. Once on-site; the MCL will reduce overhead costs such as courier, packaging, damage and tool down-time. Inquire today how a Mobile Calibration Laboratory visit can benefit your business!

The People

► Our business strength is our people. Our highly qualified team of engineers and technical officers are here to provide internationally recognised calibration services and advice.

Quality Guarantee

► VMS laboratories are accredited by NATA. Calibration services are performed by competent technicians in an environmentally controlled laboratory in accordance with designated procedures that are traceable to national standards of Australia. Always look for laboratories with the NATA logo, thus ensuring calibration is performed by competent staff, and measurements are traceable to National Standards.

Area of Measurement

► Calibration and repair solutions are provided to a diverse range of customers and industry groups. Our experience in calibration and the strict adherence to quality and performance ensures services provided comply with your strict technical requirements.

Electrical

► Multimeters, Insulation Testers, Clamp Meters, ELCB Testers, High Voltage, Earth Testers, Appliance Testers, Power Suppliers, RCL Meters.

Torque

► Torque Wrenches, Screwdrivers, Digital and Analogue Testers.

Electronic

► Oscilloscopes, Spectrum Analysers, Function Generators, Signal Generators, Waveform Analysers, Attenuators, Impedance, Power Supplies, Power & VSWR Meters, Frequency Counters & Standards, Instrument Calibrators, Communications Equipment, Voltage Standards.

Pressure and Vacuum

► Industrial Gauges, Test Gauges, Transducers, Manometers, Air Data Test Set (Pilot/Static Test Sets).

Force and Tension

▶ Testing Machines, Concrete and Pipe Testing Machines, Compression and Tension, Proving Rings.

Dimensional

▶ Micrometers, Verniers, Bore Gauges, Crimping Tools, Dial Indicators, Dial Gauges, Mass and Surface Plates (Grade A).

Biomedical

▶ Safety Analysers, Respiratory, Pressure Meters and Gauges, Patient Simulators, Ultrasound Watt Meters, Defibrillator Analysers, Electro Surgery.

Temperature

▶ Base Metal Thermocouples, Temperature Indicators, Recorders & Controllers, Dry Well Calibrators & Enclosures, Electronic Calibrators.

Industry Capability List

VMS provides calibration and repair solutions to many industry groups including:

- ▶ mechanical
- ▶ electrical
- ▶ biomedical
- ▶ defence
- ▶ electronic
- ▶ aviation
- ▶ telecommunications
