[www.techrentals.com.au](http://www.techrentals.com.au)

want to rent,  
but own your  
equipment  
too? you  
should  
consider  
our rental  
purchase  
option?

A Rental Purchase Option (RPO) is a rental agreement with an option to purchase your equipment upon completion of an agreed minimum rental term, combining the benefits of rental with those of outright purchase.

You can procure your equipment through RPO on plans that cover anywhere from 3 months to 3 years. When you want to purchase equipment, RPO is the perfect plan.

### The Benefits

- > During the rental period, the equipment is subject to all the positive benefits of rental, including maintenance.
- > Your taxation advisor will be able to assist with information relating to the financial benefits of rental as compared to other financing options, such as leasing or purchase where depreciation impacts on your balance sheet.†
- > At the end of the fixed period, following one final payment generally equal to the agreed monthly rate, the equipment is yours!

### The Agreement

- > Your customer account approval process can be complete within one working day and in most cases equipment can be delivered within 48 hours.
- > All RPO rates are subject to GST and relevant state government stamp duty.
- > Minimum monthly invoice value of \$120 (plus stamp duty, freight and GST) applies.

To take advantage of these benefits, speak with one of our test and measurement experts.

† Please ensure you obtain independent professional taxation advice.
