

TR Telecom to attend Australia's largest wireless and mobility event

Local company TR Telecom is excited to be hosting a stand at Australia's biggest wireless and mobility event this year; Wireless World 2008, in Sydney 2-3rd April.

Supporting TR Telecom will be leading international data communication's company; RAD. A global company with some of the world's leading IT and telecommunications customers, RAD data communications have established itself at the forefront of the wireless technology industry.

Promoting the latest in wireless connectivity, TR Telecom will be showcasing the RAD Airmux product range; carrier-class, high capacity, cost effective, point-to-point transmission systems used to connect Ethernet and E1/T1 circuits between two distant sites over broadband wireless.

With specialised training on the RAD product range, TR Telecom staff will be at the stand to speak directly with business and industry associates regarding the benefits of RAD data communication's wireless solutions.

Held at the Sydney Convention and Exhibition Centre, Darling Harbour on the 2nd and 3rd of April, the Wireless World event promises attendees the latest in wireless and mobility technology. And for those in business or industry, attendance is free with pre-show registration encouraged via the show website to avoid the queues.

So come down to the Sydney Convention Centre and look at the latest wireless and mobility technology solutions TR Telecom has to offer your business.
